

Clean Seas

Emissions

Clean seas is North's loss prevention initiative to promote good practice and compliance with environmental legislation.

Clean seas requires careful voyage planning to ensure that sufficient quantities of appropriate fuels for the intended voyage are ordered and supplied.

Clean seas requires ship's crew to be familiar with the maximum sulphur content allowed by international and local regulations.

Clean seas requires careful recording of the changeover to and from low sulphur fuels.

Clean seas requires engine manufacturer's instructions for fuel changeover to be carefully followed to prevent damage to machinery.

Clean seas can only be achieved by adopting good working practices on board.
