 SURENAV

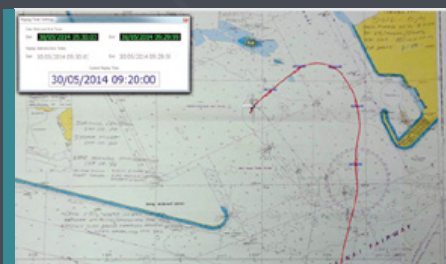

Remote Navigation Audits

To assist Members with their bridge team management, North P&I Club has partnered with SureNav to offer Members a 45% discount on a package of five remote navigational audits.

North P&I Club is committed to promoting safety on board vessels and we frequently analyse high-value admiralty claims that arise from collisions, groundings and other similar incidents. One of the most influential contributory factors to these incidents is a failure in bridge team management.

Navigational audits are increasingly being used to improve bridge team performance through continuous learning and improvement. Using remote audits results in a more cost-effective and realistic appraisal of bridge team performance.

A new approach... The Remote Navigation Audit

SureNav has developed a Remote Navigation Audit (RNA) service in collaboration with a leading data calibration and analysis company. This service is now being used by a growing number of leading shipping companies to provide increased assurance of their navigation practices.

The RNA is based around the analysis of ships' Voyage Data Recorder (VDR) data. A trained auditor (and qualified Master Mariner) uses their experience and knowledge to comprehensively review the data against regulations, best practice and company procedures using Avenca's sophisticated analysis software.

The output from the RNA is a report which contains observations and recommendations that will enable North's Members to take action to enhance navigational practices.

Benefits of Remote Navigation Audits include:

- It is an industry supported initiative including OCIMF / TMSA
- Allows for known costs with no travel logistics for auditors
- Performance assessment - continuous improvement
- An excellent bridge team training tool
- Encourages communication and bridge team cohesion
- Allows a good VDR performance check

TMSA 5.4.2

"...Where it is impractical for a vessel to be audited within the 12 month period due to trading pattern then an unannounced remote audit by an independent contractor including VDR downloads may be utilized..."

North's Members can sign up for the SureNav discounted package by contacting support@surennav.com
