# Stand Clear!

The deck can be a fast-paced and crowded working environment. The operation of moving equipment can lead to injuries if care is not taken. Before operating winches, cranes and hydraulic ramps and platforms, check: is it all clear?

### Beware! Moving nets and lines

Entanglement in nets, lines and wires can lead to injury and man overboard.

### Positive Confirmation: "Stand Clear" - "Standing Clear"

Before operating equipment, confirm everyone is standing well clear.

### Beware! Moving ramps and platforms

Entrapment and crushing injuries when working close to remote operated ramps and platforms.

### Ensure line of sight between operator, load and other crew

Make sure you can see the equipment to be operated and all other persons involved. It might be necessary to use a signaller.
