

Safety Management 2.0 Workshops

North

A sea change in approach

WHAT IS HAPPENING?

The nature of safety management is changing. Companies are increasingly looking for ways to better support seafarers.

If you are interested in changing your approach to safety you can join our two day industry expert led Safety Management 2.0 workshop, hosted by North.

TWO DAY EVENT INCLUDES

Organisational Safety Culture

Delivered by Erik Green of Green Jakobsen.

Simplifying SMS

Delivered by Terje Lovoy of Lovoy AS.

WORKSHOP FACILITATORS

North's Loss Prevention Department

North recognises the need to assist Members in realising their goal of improving safety practices and culture within their organisation.

Lovoy

For the last 10 years Lovoy has researched and developed methods to simplify and improve Safety Management Systems (SMS). The idea is simple: if the procedures are user-friendly, we will use them more. You can find out more at <https://lovoy.info/>

Lovoy project references include:

Green Jakobsen

Green Jakobsen are a leading maritime safety and human resource consultancy involved in projects worldwide.

You can find out more at www.green-jakobsen.com/

Green Jakobsen project references include:

DON'T JUST TAKE OUR WORD FOR IT

SMS Simplification by Lovoy: "An excellent course with a methodology on how to simplify our SMS, make it user friendly and effective. Useful to all office personnel involved in SMS updating. Their evaluation of a part of our SMS reviewed by Lovoy, was very indicative of this methodology."

Organisational Safety Culture: "Obviously safety culture experts with long experience on this field. Have carried out surveys on a large sample of seafarers and they grade a company's safety culture. In addition, they have helped North of England to create SCORA a benchmarking online application, which we found very interesting and have decided to use it."

Deputy Designated Person Ashore - Marine Trust Ltd

"A rare opportunity for all levels and all functions of a ship managing company! Unique in accepting that some facets of Safety Management are not so efficiently implemented, honest in examining the whys and practical in discussing improvements. Highly recommended!"

HSSQE Manager / DPA - Maran Dry Management

"The combination of Lovoy the first day with Green Jakobsen the second, was ideal.

Would highly encourage attendance. Not another boring workshop."

HSSQE Manager / DPA - Seaven Tanker Management Inc.

"I found the training really interesting and useful to refresh my knowledge on the new trends related to my day to day business at work that have to do with structuring and upgrading the safety management system in our organization.

It was a very well-balanced workshop in terms of theory and practice. I really enjoyed the interaction between the rest of the attendees and the instructors. The material distributed was useful and the content was easy to follow.

I would strongly suggest all those involved in the implementation of the ISM/TMSA/BMSA to attend this workshop."

HSSE Manager / DPA - Sea Traders S.A.

WORKSHOP FAQs

Lovoy AS

Q What is covered by Lovoy AS?

A For the last 10 years Lovoy has researched and developed methods to simplify and improve Safety Management Systems (SMS).

This is an interactive, high pace workshop with case studies and examples of how companies are using the Lovoy method to improve the usability of their SMS.

You will learn more about how to simplify and improve safety, training efficiency, compliance and seafarer satisfaction. You will also learn how to make procedures and checklists more risk based.

Q If I submit my SMS to Lovoy who can see it and what is checked?

A As part of the workshop Lovoy will offer a limited number of free SMS reviews.

Your SMS will go only to Lovoy, North will not see any submitted documents.

This is not a review of the technical content of your SMS. It's more focused on the way content is presented.

Lovoy will not evaluate if you cover all the requirements of any codes, conventions or industry guidance documents. The review will analyse how user-friendly your SMS is from the seafarer's perspective. The goal is to change a complex SMS text to clear and easy to use text.

All feedback is confidential and Lovoy will not share it with any other parties. Lovoy will not discuss your text in the workshop.

You will receive more detailed instructions on submitting your SMS nearer to the event.

Q What do I need to bring?

A You need to bring either a laptop or a tablet to the workshop. This will enable you to take part in the interactive exercises throughout the day.

Q Will we get a copy of the course material?

A Yes! Lovoy will send all delegates the course material on completion.

Q Where can I get more information About Lovoy?

A For more information on Lovoy, visit <https://lovoy.info/>

WORKSHOP FAQs

Green Jakobsen

Q What is covered in the Green Jakobsen workshop?

A In this interactive workshop Green-Jakobsen allows delegates to explore a number of issues around measuring and assessing safety performance from both an organisational perspective and a crew perspective. The workshop will also include an introduction to North's new SCORA self-assessment tool that provides you with an insight into your company's organisational safety capacity.

Q Do I need to do anything before the Green Jakobsen workshop?

A No, there is nothing you need to complete prior to the event.

Q Will we get a copy of the course material?

A Yes! We will send all delegates the course material on completion.

Q Where can I get more information about Green Jakobsen?

For more information on Green Jakobsen, visit www.green-jakobsen.com/
